Literature taxonomy

Themes describe verified prior art and experimental roles; box size does not encode evidence strength.

World prediction

RSSM, tokens, features, diffusion
W01–W05

Joint object futures

Slots, trajectories, flows, occupancy
W06–W11, W21–W23

Classical beliefs

Particles, mixtures, RFS, PSR
W12–W18, Q05–Q06

Quantum-inspired mathematics

HQMM, purification, projective rays
Q01–Q19

Robot control

Reactive, time-aware, risk, belief-space
R01–R12

Validation

Social benchmarks, calibration, transfer
R13–R16, W19–W20

Research question: which explicit structure earns a useful accuracy–safety–cost tradeoff?
